

FREE Screening for AAA

AAA is a ballooning of the Abdominal Aorta - the artery that carries blood to the lower part of the body. **AAA** is a potentially life-threatening condition, and research suggests that more than one million people are living today with an undiagnosed **AAA**.

Who is most at Risk?

- Smokers
- Former Smokers
- Those with high blood pressure
- Those with high cholesterol
- Individuals over 60 who have at least:
 - 2 cardiovascular risk factors and men 55 and older with a family history of AAA and at least 1 additional cardiovascular risk factor

Recommended once per 5 years
